Features

- ◆ EarthChoice Plastarch Material (PSM) is manufactured from 20% renewable plant starch and contains a blend of polypropylene fillers. PSM is derived from corn, which is an annually renewable resource that can handle temperatures up to 200° F, making it perfect for higher-heat applications.
- ◆ Our EarthChoice Recycled Polypropylene cutlery is made from a minimum of 20% previously used post-consumer plastic products. Products made from post-consumer materials mean less plastic in landfills. This unbreakable lineup performs with the same strength as traditional polypropylene cutlery and can be used for both hot and cold foods.
- ◆ Made in the USA from globally sourced materials
